

## Ladder, safety cage and based bail it cooling towers

## Options and accessories

## Ladder, safety cage and handrail

A ladder, safety cage and handrails are all installed for **easy access to the unit top and easier and safer** inspection and maintenance, in line with **European and South African safety standards**. For units equipped with these options, we also recommended installing <u>steel drift eliminators</u>.

Want to extend your cooling tower with these options for easier and safer inspections? Contact your <u>local BAC representative</u> for more information.
