

Axial fans

Spare parts guide

Axial fans

Axial fans

Benefits

BAC axial fans ensure **optimal air movement, energy efficiency and thermal performance**

Each individual BAC unit has a suitable propeller, manufactured exclusively as per BAC specification, to **match airflow and pressure heat** requirements. Fan performance is tested in our [R&D laboratories](#).

Standard features

- **Low noise**
- **High efficiency** for minimal energy consumption.
- Constructed of **corrosion resistant material**: Aluminium, PVC, FRP blades, depending on unit model and application.
- **Factory balanced** for easy installation and vibration-free operation
- Available in **kits**, including bushing and hardware for installation

BAC upgrade tip

Reduce the noise emission of your existing unit to meet new more stringent environment requirements. **Whisper Quiet Fans** are available on most models as retro-fit kit.

Want to replace the axial fan of your BAC cooling equipment?

Contact your [local BAC representative](#).
