Spare parts guide

Belts

Belts

Benefits

BAC belts are selected and [tested](#) for each BAC unit type, ensuring **year-round reliable** and **vibration-free operation** of your BAC cooling equipment.

Features

- Type, size and quantity of belts depend on BAC unit type.
- Minimum operating life-time expectancy of 25.000 hours.

Maintenance tip !

When replacing belts on a multiple belt drive system always make sure to replace the complete set, and re-check alignment and tensioning.

Proper **belt tension** is vital for a long belt service life. Check the [operating and maintenance manual](#) of your BAC equipment for proper belt tension information.

Want to replace the belts of your BAC cooling equipment? Contact your [local BAC representative](#).
