

Combined inlet shields

Spare parts guide

Combined inlet shields

Combined inlet shields

Combined inlet shields replace traditional air inlet louvres and intake screens and improve your cooling equipment **hygiene**.

Benefits

- Eliminate water splash-out
- Protect the circulating water from exposure to sunlight, hence they reduce the growth of algae or harmful bacteria.
- Act as a filter, preventing contamination of the basin water due to debris and reducing basin cleaning.
- Reduce risk of ice formation at the air inlet during freezing conditions.
- Corrosion and UV resistant PVC honeycomb material.
- Light weight, easy to handle and to remove without tools
- Upgrade - retrofit kits available for replacing old style air inlet louvers on all unit types.

Hygiene tip !

Replace your traditional inlet louvers with the new standard combined inlets shields to benefit from **improved hygiene** and **reduced maintenance**.

Want to benefit from combined inlet shields? Contact your [local BAC representative](#).
