

# **FXV-D**

## Closed circuit cooling towers

### Key benefits

- Star in energy efficiency
- Low maintenance and easy inspection
- Optimal performance guaranteed

#### **FXV-D** characteristics

Combined flow, axial fan, induced draft

#### **Capacity range**

up to 2290 kW

#### Maximum entering fluid temperature

82°C

#### **Typical applications**

• Medium to large HVAC and industrial applications such as electric arc furnaces and pharmaceutical plants.

#### Star in energy-efficiency

- <u>Evaporative cooling</u> PLUS unique combined heat transfer system for minimized system-wide energy consumption.
- Axial fan half the consumption of rivals and huge single cell capacity: saving you more!
- BACross II fill factory-configured for unrivalled water/air contact and minimal air pressure drop.
  Guarantees optimal cooling tower efficiency with cooling system energy well under control.
- · High efficiency fan motors.

#### Low maintenance and easy inspection

- Inspect and maintain towers with unrivalled comfort and safely: while standing inside.
- The FXV-D has a spacious plenum (internal area) and easy inspection/maintenance access
- Fans are easily accessible from the in- and outside
- Inspect internal fill and coil easily via removable drift eliminator modules.
- The <u>BACross II fill</u> is telescopically-supported for easy sheet by sheet inspection/cleaning and no dismantling.
- Self-cleaning cold water basin and fill above **sloped basin** to flush out dirt and debris.

#### **Optimal performance guaranteed**

- Unique and patented heat transfer system: <u>featuring combined flow</u> via heat exchange coil and fill pack, for fine temperature applications and thermal challenges.
- Huge industry-best single cell capacity!
- BACross II fill patented sheet and maximum air/water contact for optimal heat transfer performance.
- Encased in corrosion-resistant fibreglass polyester for long service life.

#### Ultra silent design

- FXV-D units include **low noise axial fans** for minimal surrounding noise. To reduce noise even further, choose Whisper Quiet fans.
- Factory designed, tested and rated <u>sound attenuation</u> is available on air inlet to cut operation noise even further.
- BACross II fill guides smoothly the water all the way into the basin without water splash noise.

#### **Cheap to install**

• FXV-D cooling towers are factory-built and shipped in sections for larger models to reduce the overall size and weight, allowing easy on-site section assembly with smaller crane.

#### Unmatched hygiene control

- Easy-clean and easy-inspect FXV-D towers **reduce hygiene risks** from bacteria or biofilm inside.
- **Combined inlet shields** block sunlight to prevent biological growth in the tower, filter the air and stop water splashing outside.
- The **drift eliminators** to prevent droplets escaping into the air are tested and certified by Eurovent.

Interested in the FXV-D cooling tower for cooling your process fluid? Contact your <u>local BAC</u> representative.
